

# Inspired by Insects Science Club

## Session 3: How to make an insect hotel

### You will need:

 A large plastic bottle with the top and the bottom cut off to form a tube.

 Natural materials such as sticks, leaves, moss and grass

### What to do:

 Begin to fill the tube with layers of natural materials.

 Add more layers including sticks to give structure.

 Continue until the tube is packed tightly with the materials.

 Site your insect hotel and leave it for at least a week.
